

CHALLENGE

Objective:

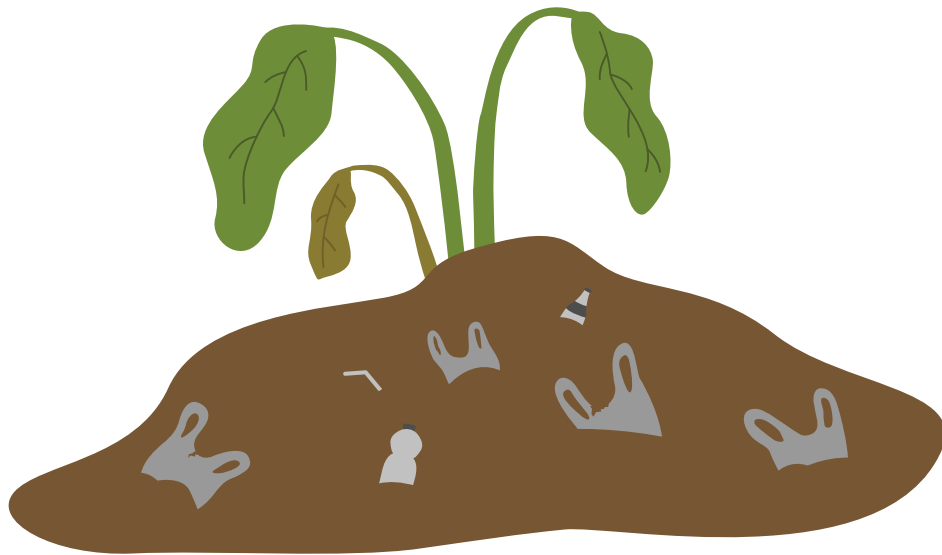

Understand and address soil pollution by creating a project that educates others and promotes sustainable practices to protect the soil.

Challenge Task:

Choose one of the following activities:

- Visual Presentation: Create a poster, infographic, or short video explaining:
 - a. What soil pollution is.
 - b. Its causes (e.g., pesticides, industrial waste, littering).
 - c. Its impact on plants, animals, and humans.
- Clean-Up Action: Organize a small cleanup in your garden, neighborhood, or park, focusing on removing litter that could harm the soil. Document the activity with photos or videos.

Criteria:

- Who: Individuals or groups (max 3 people).
- Where: At home, school, or outdoors.
- How Long: 1 week to complete the activity.
