## What is VOYAGER?

VOYAGER is the acronym of the EU co-funded project named “Promoting voluntary engagement of young people for a green environment and in the fight against climate change”. The project aims to encourage youth to develop themselves on environment and climate change through specific training materials, so that they can work/act voluntarily on environmental issues.

## Training

The project will train innovators, youth workers, youth trainers and youth leaders to become real change agents and volunteers in the field of environment and climate change.

## Digital tools

The project will provide digital tools and applications for social development, environmental protection and the fight against climate change.

## Promotion

The project is about promoting volunteering and active citizenship among young people through volunteering and solidarity actions based on their daily life and their will to adapt or change their attitude toward a more aware and ecofriendly everyday life.

## Partnership

- Ecocene - France
- Pistes Solidaires - France
- ESICA - Austria
- Avrasya Yenilikçi Toplum Derneği - Türkiye
- Balkan Institute of Innovative Development - Bulgaria
- Institute of Entrepreneurship Development - Greece

## We held the first meeting!

In order to launch the project, partners convened in Pau, France. Following a general presentation about the project, we continued to discuss about management related issues and our first steps towards upcoming tasks.

We can't wait to present first results!

## First output: Digital toolkit

We are currently focused on developing a digital toolkit that is focused on environment and climate change training. Main motivation behind this digital toolkit is to set the ground for common green action in the future, as well as raising awareness and actions for environment and climate change.

This digital toolkit will be an accessible and well-rounded tool and it may be adapted in contents and subjects as well. All the materials will be translated into partners' national languages in order to increase national impact. Last but not least, the target groups in all levels and other beneficiaries will be encouraged to use this transferable and innovative device.

## Target Groups

- 15-30 year old youth
- Youth workers, trainers, leaders
- Environmental educators
- Youth & environmental organizations and their members
